DETAILED ACTION***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on 5 January 2007 has been entered.

Response to Amendment

On 5 January 2007, applicant amended claim 36. Claims 36-48, a total of 13 claims, are pending and are allowed.

An updated search was done on the amended claims.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The closest domestic Prior Art is the combination of Schein and Owens.

Shein does not disclose the unique related processes performed by class objects. Specifically, Schein does not disclose "stored value products ... second subsection containing a high- level secondary class of objects and a second plurality of secondary classes of objects derived from said high-level secondary class of objects, wherein each of said second plurality of secondary classes of

objects define one of said plurality of stored value products; and, Wherein said second plurality of secondary classes of objects inherit attributes from said high-level key class of objects". On the other hand, Owens discusses an object-oriented paradigm, but does not disclose of a one-to-one relationship between objects and specific products. While Owens incorporates class objects in order to model table structures and data outside of the database, there is no disclosure as to the specific relationship between the various class objects in order to maintain stored value products and business units.

The closest foreign Prior Art is EP 667586 A2, published 16 August 1995, Database generator. However, there is no discussion of "...stored value products ... second subsection containing a high-level secondary class of objects and a second plurality of secondary classes of objects derived from said high-level secondary class of objects, wherein each of said second plurality of secondary classes of objects define one of said plurality of stored value products; and, Wherein said second plurality of secondary classes of objects inherit attributes from said high-level key class of objects".

The closest non-patent literature Prior Art is Deborah Radcliff, "*Universal servers: Does on size fit all?*" Software Magazine. Englewood: May 1997. Vol.17, Iss. 5; pg. 36, 7 pages, downloaded from ProQuest on the Internet on 18 January 2007. Radcliff discloses development of a cash-card application using the DB2 image extenders to house and manipulate photo ID debit cards for college students and link those IDs to digitized cash credited to them. Both the digitized cash and the accompanying student photo can be accessed from any terminal

location throughout a participating campus. Again, there is no discussion of "...stored value products ... second subsection containing a high- level secondary class of objects and a second plurality of secondary classes of objects derived from said high-level secondary class of objects, wherein each of said second plurality of secondary classes of objects define one of said plurality of stored value products; and, Wherein said second plurality of secondary classes of objects inherit attributes from said high-level key class of objects".

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
